From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Serving as an early port for the shipping interests of New World colonists, Carteret County has enjoyed a long and rich history, one dependent on both the nurturing and destructive character of the sea. Founded by a community of tough and hardy seafarers, the county's earliest towns, Beaufort, Portsmouth Village, and Morehead City, blossomed into centers of culture, attracting entrepreneurs, recreational hunters and fishermen, families looking for new beginnings, celebrities, and eventually, tourists. This volume, with over 200 extraordinary black-and-white images, captures 100 years of life in Carteret County, from the beginning of the twentieth century to its end. An enchanting visual tour of the Carteret of yesteryear, Carteret County explores the early families, such as the Moreheads, Arendells, and Webbs, that made their homes along the coastline and in the various island communities, the fishermen applying coordination and skill with cast nets and long nets from small vessels to larger trawlers, the men and women laboring in the wharf's fishhouses, and the everyday citizens who worked, played, and lived on the edges of the Crystal Coast.

The Great Ride of China is the story of Buck Perley and Amy Mathieson's 21,000-mile, record-breaking trip around one of the world's oldest and most diverse countries. Follow them on a journey that takes them through grass plains, sand storms, 20-mile traffic jams in the center of coal country, and to the Rooftop of the World in the Himalayas.
