If I just knew where to start, I could do the rest on my own! The problem says, "The equations of parabolas, circles, ellipses, and hyperbolas are given. Graph the equation." The one I start with is $x^2 +y^2=30$. It looks like the standard equation of a circle, but I'm not sure if that's what I need to use? Thanks so much in advance :) I just need to get this one problem done so I can move on!
