The Poincare Half-Plane provides an elementary and constructive development of this geometry that brings the undergraduate major closer to current geometric research. At the same time, repeated use is made of high school geometry, algebra, trigonometry, and calculus, thus reinforcing the students' understanding of these disciplines as well as enhancing their perception of mathematics as a unified endeavor.

Understanding Research in Clinical and Counseling Psychology, Second Edition is designed and written for graduate students aspiring to careers in practice and presents research as an indispensable tool for practice.

This new edition provides an overview of police patrol that combines theory with practical applications for police supervisors, executives, and those in support-service roles who want to know how their work contributes to public safety. It covers patrol operations, goals and strategies. It combines management theory with case study examples taken from small police departments. The new edition adds coverage of community and problem oriented policing. Each chapter focuses on a specific aspect of police patrol operations. Includes a new chapter on community-oriented policing that reflects the latest developments in the field, as well as a new chapter on special issues in police patrol that highlights the police and the community, special problems and special people.

Never HIGHLIGHT a Book Again! Virtually all testable terms, concepts, persons, places, and events are included.
