usually involves the modification of an existing dietary lifestyle to promote optimum health. However, in some cases, an alternative dietary lifestyle plan may be developed for the purpose of eliminating certain foods in order to reclaim health.

~~What is Diet Therapy? (with pictures)~~

Alkaline diet. This diet claims eating high alkaline foods such as green vegetables, fruits, oily fish and nuts lowers the acidity levels in the body. A low acid level is said to stop cancer growth, but there's no evidence to support this claim. Macrobiotic diet

~~Complementary therapies based on diet | Cancer Council ...~~

Diet Therapy For The Common Diet therapy may also be employed in the prevention or supplemental treatment of cancer. The intake of high levels of antioxidants and bioflavonoids that come from many fruits and vegetables deters oxidative stress in the body, which may help to prevent many types of cancer. Specifically, vegetables in the

~~Diet Therapy For The Common Diseases Of Parents Chinese ...~~

The economics are changing, fortunately, as the news spreads that "food poisoning" (due to subsisting on the rich Western diet) is the cause of most of our chronic diseases, and that diet therapy will prevent and cure most of these patients. You can become a dominating part of this multi-trillion-dollar medical-care business (about \$9,990 annually per US citizen) by practicing diet therapy: the prevention and cure of common diseases by teaching patients how to stop food poisoning (via the ...

~~Diet Therapy: The Prevention and Cure of Common Diseases~~

08 July, 2011. The term "diet therapy" refers to the usage of food and nutrition in controlling symptoms and creating the best possible life for yourself through health and wellness. Some illnesses can be effectively managed by altering your diet, and diet therapy is sometimes used before surgery to ensure that surgery is absolutely necessary.

~~What Are the Basic Principles of Diet Therapy? | Healthfully~~

Fresh fruits and vegetables play a very important role in boosting the immune system of the body in order to fight with common variable immune deficiency (CVID). Raw foods are rich sources of enzymes that help in the digestion. Fiber would help to enhance the resistance mechanism of the patient.

~~Obesity Treatment NHS~~

Coeliac disease is usually treated by simply excluding foods that contain gluten from your diet. This prevents damage to the lining of your intestines (gut) and the associated symptoms, such as diarrhoea and stomach pain. If you have coeliac disease, you must give up all sources of gluten for life.

~~Coeliac disease Treatment NHS~~

If your diet is partly causing your iron deficiency anaemia, your GP will tell you what foods are rich in iron so you can eat more of them. Eat and drink more: dark-green leafy vegetables like watercress and curly kale; cereals and bread with extra iron in them (fortified) meat; pulses (beans, peas and lentils) Eat and drink less: tea; coffee; milk and dairy

~~Iron deficiency anaemia NHS~~

Ketogenic diet. A ketogenic diet is a diet high in fats, and low in carbohydrates and protein. In children, the diet is thought to make seizures less likely by changing the levels of chemicals in the brain. The ketogenic diet was one of the main treatments for epilepsy before AEDs were available.

~~Epilepsy Treatment NHS~~

There are a number of treatments available to help you manage and treat your diabetes. Everyone is different, so treatment will vary depending on your own individual needs. If you have type 1 diabetes, you'll need to use insulin to treat your diabetes. You take the insulin by injection or by using a pump. It's also free on prescription.

~~Treatments and management for your diabetes | Diabetes UK~~

Fiber helps reduce constipation but also can worsen gas and cramping. Try slowly increasing the amount of fiber in your diet over a period of weeks with foods such as whole grains, fruits, vegetables and beans. A fiber supplement might cause less gas and bloating than fiber-rich foods.

~~Irritable bowel syndrome Diagnosis and treatment Mayo ...~~

Liquid diet. For children and young adults, a liquid diet (enteral nutrition) can also help reduce symptoms. This involves having special drinks that contain all the nutrients you need, instead of your usual diet, for a few weeks. It avoids the risk of slower growth that can happen with steroids.

~~Crohn's disease Treatment NHS NHS~~

To achieve weight loss, your diet should be low-calorie, and because type 2 diabetes is a lifetime condition, it is important to have a diet you are happy to commit and stick to. In the modern world, many of us have become accustomed to eating energy-dense foods, such as bread, rice, pasta and potato-based foods.
