Your Intellectual Brain Takes shortcuts. Sees a “tree,” “face,” “pear.” Separates the view into small, unrelated pieces. Makes drawing and painting feel like work. Your Visual Brain Enjoys the scenery.~~

~~Improve Drawings and Paintings using the ... – Artists Network~~

~~The theory behind right brain exercises for artists is that the left brain easily gets bored and switches off, leaving the right brain 'in charge'. This is not to imply that the right brain exercises are boring or dull, rather they may be something that feels 'unnatural' or that you can't see the logic in doing.~~

~~Right Brain Exercises for Artists – LiveAbout~~

~~The rather small study, published in *NeuroImage*, is based on the brain scans and drawing performances of 21 art students (graduates and undergraduates attending art and design courses in London at Camberwell College of Art and The Royal College of Art) and 23 non-artists. The scan findings also showed that those who identified as artists -- as well as those who performed better on the drawing tests -- tended to have more grey matter in the parietal lobe, a region involved with spatial ...~~

~~Artists' Brains Have More 'Grey Matter' Than The Rest Of ...~~

~~A perfect example of artists training themselves to change their thinking and therefore their approach to art is Betty Edwards' book, *Drawing on the Right Side of the Brain*. The first edition was released in 1980 and since the fourth edition's release in 2012, the book has become a classic in the art world.~~

Official website of Betty Edwards, author of Drawing on the Right Side of the Brain. Features Betty Edwards' blog, information about creativity, drawing workshops by artist Brian Bomeisler, DRSB Shop to purchase art and drawing tools and materials.

~~Drawing on the Right Side of the Brain~~

Even when imitating the scan path of a non-artist, artists were still able to recall more details than non-artists. When common people draw, they try to draw an object, which is why it looks nothing like the one they see. Artists instead focus on the whole visual field and place the shadows and surfaces on the paper, along with the "subject".

~~Do Artists' Brains Really Differ From Other People ...~~

One of the exercises in Betty Edwards' wonderful book "Drawing on the Right Side of the Brain" is to copy a sketch of Picasso's "Portrait of Igor Stravinsky," but draw it upside down. I was able to do it quite well the right way up (I do have natural artistic ability and am naturally 'right brain' oriented) but was surprised how much easier it was when I turned the original drawing upside down.

~~Learning to Draw by Using the Right Side of Your Brain ...~~

When you draw a bad representation of something, it's because you are drawing what your logical brain "thinks" the subject looks like and not what is truly there. To draw a subject accurately, you have to draw what is really there. Blind contour drawing makes your logical brain shut up for a while.
