ecological relationships
food webs answers

All the food chains are interconnected and overlapping within an ecosystem and they constitute a food web. In natural environment or an ecosystem, the relationships between the food chains are interrelated. These relationships are very

Download Free Ecological Relationships

complex, as one organism may be a part of multiple food chains.

Hence, a web like structure is formed in place of a linear food chain. The web like structure is formed with the interlinked food chain and such matrix that is interconnected is known as a food ...

Description. This hands-on activity allows students to build model food webs and then evaluate how ecological disturbances affect each trophic level. Students begin the activity by identifying producers

Download Free Ecological

and consumers in the savanna ecosystem of Gorongosa National Park in Mozambique.

Using a set of “Gorongosa cards,” they create food chains to show the flow of energy in the system, introduce an ecological force or disturbance (e.g., fire), and predict how that force would impact animals ...
