Employing any or all of these strategies—each submitted by an instructor in our WileyPLUS community—can help promote self-regulated learning in your classroom. 1 of 17 View More SlideShares From Wiley

~~What is Self-Regulated Learning?~~

Self-regulated learning (SLR) is recognized as an important predictor of student academic motivation and achievement. This process requires students to independently plan, monitor, and assess their learning. However, few students naturally do this well. This paper provides a review of the literature including: the definition of SRL; an explanation of the relationship between SRL and motivation in the classroom; specific SRL strategies for student use; approaches for encouraging student SRL ...

~~"Encourage Self-Regulated Learning in the Classroom" by ...~~

The evolution of the teacher-controlled learning environment to include more self-directed online education has highlighted the need for students of all ages to develop self-regulated learning skills. Self-regulated learning is how students regulate their own emotions, cognition, behaviour and aspects of the context during a learning experience.

~~Teaching self-regulated learning skills—Teacher~~

Learning analytics for learners has the ability to greatly improve learners' self-regulation. Current learner dashboards are mostly providing learners with an isolated view of their learning behavior, while we believe learners will gain more from a comparison of their own behavior with that of successful peer learners.

~~Encouraging Metacognition & Self-Regulation in MOOCs ...~~

Self-regulated learning (SRL) is one of the domains of self-regulation, and is aligned most closely with educational aims. Broadly speaking, it refers to learning that is guided by metacognition (thinking about one's thinking), strategic action (planning, monitoring, and evaluating personal progress against a standard), and motivation to learn.

~~Self-regulated learning—Wikipedia~~

Self-regulated learners are aware of their strengths and weaknesses, and can motivate themselves to engage in, and improve, their learning. Developing pupils' metacognitive knowledge of how they learn—their knowledge of themselves as a learner, of strategies, and of tasks—is an effective way of improving pupil outcomes.

~~Metacognition and Self-regulated Learning | Education ...~~

To have capacity to self-regulate learning, learners must be able to make choices and, within relatively wide limits, to act on their choices. Without such latitude of behavior, learning is other-regulated rather than self-regulated. Agency is the common term used to describe this capacity to choose and act on choices.
