Feminist perspective highlights the social issues that are often overlooked or misidentified by already present social theories. It analyses women's experiences of gender subordination and identifies the underlying causes of gender oppression. It closely studies women's social roles, interests and experiences at both micro and macro level.

Description: Feminist perspectives on equity and trusts
If feminism is defined as the work to ensure gender equality, what social theory works to ensure gender equity? Equality comes with connotations of sameness, of homogeneity; equity is about accepting differences, acknowledging that different people need different things to be successful, and recognising that we all start from somewhere different.

Many feminists embrace (and defend) the orienting ideals and tradition-specific conventions associated with the fields in which they work. Some focus chiefly on equity issues, often insisting that gender bias in the institutions of science does not bear on issues of content or method (see the section Feminist Equity Critiques). Others make a case for redefining research priorities without challenging existing research traditions; they aim to extend well established modes of inquiry to ...
