In reading Future Noir, one quickly becomes aware of just how thorough Sammon has been, having interviewed seemingly _everyone_ who had any involvement in the making of the film, from Philip K. Dick, the author of Do Androids Dream of Electric Sheep?, the novel on which Blade Runner was based, to Charles Lauzirika, the DVD producer who was instrumental not only in the production of the Special Edition DVD set for the Final Cut of the film but also in locating an enormous trove of "lost" film ...

FUTURE NOIR: The Making of Blade Runner (Dey Street Books, HarperCollins) by Paul M. Sammon has a headline that's not hyperbole--The Fascinating Story Behind the Darkest, Most Influential Sci-fi Film Evermade. Though 594 pages, I found this book obsessively interesting, though I'm not a Blade Runner fan.

Rediscover the groundbreaking magic of Blade Runner with this revised and updated edition of the classic guide to Ridley Scott's transformative film—and published in anticipation of its sequel, Blade Runner 2049, premiering October 2017 and starring Ryan Gosling, Jared Leto, Robin Wright, and Harrison Ford. Ridley Scott's 1992 "Director's Cut" confirmed the international film cognoscenti's judgment: Blade Runner, based on Philip K. Dick's brilliant and troubling science fiction masterpiece Do Androids Dream of Electric Sheep?, is the most visually dense, thematically challenging, and influential science fiction film ever made. Future Noir offers a deeper understanding of this cult phenomenon that is storytelling and visual filmmaking at its best. In this intensive, intimate and anything-but-glamorous behind-the-scenes account, film insider and cinephile Paul M. Sammon explores how Ridley Scott purposefully used his creative genius to transform the work of science fiction's most uncompromising author into a critical sensation, a commercial success, and a cult classic that would reinvent the genre. Sammon reveals how the making of the original Blade Runner was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry at the time it was made. This revised and expanded edition of Future Noir includes: An overview of Blade Runner's impact on moviemaking and its acknowledged significance in popular culture since the book's original publication An exploration of the history of Blade Runner: The Final Cut and its theatrical release in 2007 An up-close look at its long-awaited sequel Blade Runner 2049 A 2007 interview with Harrison Ford now available to American readers Exclusive interviews with Rutger Hauer and Sean Young A fascinating look at the ever-shifting interface between commerce and art, illustrated with production photos and stills, Future Noir provides an eye-opening and enduring look at modern moviemaking, the business of Hollywood, and one of the greatest films of all time.

The 1992 release of the "Director's Cut" only confirmed what the international film cognoscenti have know all along: Ridley Scott's Blade Runner, based on Philip K. Dick's brilliant and troubling SF novel Do Androids Dream of Electric Sheep, still rules as the most visually dense, thematically challenging, and influential SF film ever made. Future Noir is the story of that triumph. The making of Blade Runner was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry. A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, Future Noir is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.

This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in Paradise Lost, Frankenstein, detective fiction, and previous science fiction cinema.

A time traveling cave. A vicious band of miners...and pure gold. When West Virginia teenagers Emma and Brody promised their neighbor, a famous geologist, to help rebuild his decimated rock and mineral collection for a museum display, they didn't know they would be in for the magical ride of a lifetime. After a successful trip to 1775 England where they collected the rare Blue John Fluorite, the teens are quick to jump at the chance to travel to the California Gold Rush in 1851. When they arrive at the Gold Rush and meet an old acquaintance, they think the mission will be easy until they realize their friend may not be able to help them at all. When their actions in the past erase their future, can Emma and Brody right the wrong? With a hostile group of miners hot on their trail, Brody and Emma must collect the gold, save their friends, and salvage the future before it is too late. Rusher's Gold is the second book in the middle grade adventure/sci-fi series Crystal Cave Adventures. If you like adventure and time travel mixed with your geology, then you'll love Tracy Diane's exciting series.

Kirkus Reviews called Splatterpunks "an authoritative and intelligent collection for horror fans willing to go all the way". Now, this second volume of taboo-shattering horror stories and essays goes beyond the limits of convention--into the darkest corners of the human soul.

Danielle is a troubled but bright girl at Martino Prep, an old private academy she attends to help her chances of getting into a top-rated medical school. After a new student arrives and disrupts Danielle's plans, simple jealousy develops into a path of obsession and carnage. ANTIPATHY is a psychological horror thriller that pays homage to Italian Giallo and American slasher films. For Mature Readers Only.

THE LEMON DAY was inspired to me from my three-year-old, Kelly, as to how she pronounced "Lemon-aid". I made a list of those slightly different ways that she pronounced things and worked a rhyming story around it. Basically, there is a grumpy, not too kind, character who is in a sense a bully. He gets put in his place by the other, kind, characters in the story and has a change of heart. It is a children's story, but I find it to send a positive message to all ages, with the main point being "it's OK to be different, choosing acceptance and above all to always keep the imagination alive!" I dedicated it to my Mother, Suzanne THE LEMON DAY is a cute, fun and wonderful book.

This epic memoir captures the emotional journey of a preteen coming of age in the Nation's capitol during an era in which Washington, D.C. was the murder capitol of the country. From his initiation into the drug trade at the age of twelve, to his receiving two life sentences at the age of sixteen, the words on these pages relate a tale that is devastating and inspiring in the same breath as its readers will learn the path to contrition which Halim A. Flowers took to transform from a prisoner to a publisher, author, poet, blogger, college student, and an at-risk youth activist.

In the year 2040, America faces divide. Terrorist assaults, racial conflicts and political opportunists threaten its very survival. A riveting, thought-provoking tale, Melting Point 2040 explores the human costs of an America growing apart - following intertwined lives of a young Mexican immigrant, a disconnected survival gaming fanatic, a University professor and others competing to resolve disputes on their terms. It's a different world. America's economic supremacy has been surpassed. Computer programs drive cars that shape around passengers. English is no longer the primary language in several of 52 states. With a second Great Depression embedded in the nation's mindset and many issues unresolved for generations, America's most divisive challenge since the Civil War is coming to full boil. America's future may depend on a reluctant hero.
