Green construction is environmentally friendly because it uses sustainable, location-appropriate building materials, and employs building techniques that reduce energy consumption. The primary objectives of sustainable design and construction are to avoid resource depletion of essential resources such as energy, water, and raw materials, and prevent environmental degradation.

~~Green Construction Project Management and Cost Oversight ...~~

Green Construction is a part of the broader term ' sustainable construction '. Basically, the term addresses the ecological, economic and social issues around building. In fact, Green Construction embodies the entire lifecycle of a building – from the design concept to the disposal of the building. Furthermore, in green building practices, there are three major categories:
