Hormones From Molecules To Disease - Bit of News

The discovery of hormonal molecules and endocrine interactions and the subsequent understanding of hormone-related pathophysiology has led to the development of new strategies in medical treatment such as fertility control and the management of diabetes.

Hormones: From Molecules to Disease: Baulieu, Etienne ...

They are different from hormones, which are also important cell signaling molecules. Hormones circulate in higher concentrations, and tend to be made by specific kinds of cells. Cytokines are important in health and disease, specifically in host immune responses to infection, inflammation, trauma, sepsis, cancer, and reproduction.

Cytokine - Wikipedia

25 Most signaling molecules are not cell-permeable Steroid hormones are unusual signaling molecules: most molecules used for intercellular signaling cannot pass the plasma membrane Receptors therefore need to detect extracellular molecules, and interact with intracellular factors to transduce the signal. Any receptor for a cell-impermeable molecule must be a transmembrane protein Most ...
