Invasive Weeds of North America: A Folding Pocket Guide to ...

This is a list of invasive species in North America. A species is regarded as invasive if it has been introduced by human action to a location, area, or region where it did not previously occur naturally (i.e., is not a native species), becomes capable of establishing a breeding population in the new location without further intervention by humans, and becomes a pest in the new location ...

Invasive species - Wikipedia

Some invasive plants are classified as noxious weeds that are "injurious" to humans and wildlife. These produce allergens, or are toxic by contact or ingestion. Not all plants that come from a different continent are invasive, and even some plants that are native to North America can be classed as noxious or aggressive when they land in a state they are not indigenous to.
