From one of Time magazine's 100 most influential people in the world, a rousing defense of the role of science in our lives. The latest developments in physics have the potential to radically revise our understanding of the world: its makeup, its evolution, and the fundamental forces that drive its operation. Knocking on Heaven's Door is an exhilarating and accessible overview of these developments and an impassioned argument for the significance of science. There could be no better guide than Lisa Randall. The bestselling author of *Warped Passages* is an expert in both particle physics (the study of the smallest objects we know of) and cosmology (the

study of the largest). In *Knocking on Heaven's Door*, she explores how we decide which scientific questions to study and how we go about answering them. She examines the role of risk, creativity, uncertainty, beauty, and truth in scientific thinking through provocative conversations with leading figures in other fields (such as the chef David Chang, the forecaster Nate Silver, and the screenwriter Scott Derrickson), and she explains with wit and clarity the latest ideas in physics and cosmology. Randall describes the nature and goals of the largest machine ever built: the Large Hadron Collider, the enormous particle accelerator below the border of France and Switzerland—as well as recent ideas underlying cosmology and current dark matter experiments. The most sweeping and exciting science book in years, *Knocking on Heaven's Door* makes clear the biggest scientific questions we face and reveals how answering them could ultimately tell us who we are and where we came from.

In the novel *Knock, Knock, Knocking On Heaven's Door*, members of the 27 Club — Janis Joplin, Jimi Hendrix, and Jim Morrison — arrive in heaven. They find themselves onstage at a talk show hosted by Jesus. The three don't know why they're there or what's going on. They doubt they should even be in heaven, what with the lavish lifestyles that they've led, which included sex, drugs, and rock 'n' roll. Eventually, their humanity is called into question. Their pasts come to haunt them, and one by one the three relive their lives on earth. Their old loves and pain are replayed before their eyes. Jesus is toying with the artists, getting His kicks as each of the guests experience misery. Their tortured souls and losses only make them more human. Are the musicians alive or dead? Are they in heaven or hell? One by one, they question their existence and whether they will make it up the stairway to heaven.

Argues that the various aspects of the "counterculture" of the 1960s had a significant impact on American religious institutions.

On a hotter and more volatile earth in the twenty-third century, humans like Clare and Jon live in utopia, hunting and gathering in small tribal bands, engaged in daily art and ritual, reunited with old friends like the shaggy mammoth and giant ground sloth. Even better, they still have solar-powered laptops and can communicate with each other around the world. The understanding of physics has also advanced. When scientists first cloned extinct species from the Pleistocene, they discovered that many of them were telepathic—that consciousness travels in waves. For most people, animism has become the preferred religion, a panpsychism compatible with the laws of a fractal holographic universe. As Clare tells one of her students, the return to an older, Paleolithic lifestyle is “one of humanity’s greatest achievements.” It’s too bad that utopia had to come at such a cost: a genetically engineered super-virus that wiped out most of earth’s human population. Humanity was shaken by that event, and humanity vowed to change. Now, on the 150th anniversary of that catastrophe, a small group of men and women—as well as a smarter-than-average dire wolf and saber-toothed cat—are suddenly faced with decisions in which the stakes are higher than ever before. Will earth repeat the cycle of unbridled hubris? Or is humanity’s destiny even stranger than that? Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies,
