Linear algebra gives you mini-spreadsheets for your math equations. We can take a table of data (a matrix) and create updated tables from the original. It's the power of a spreadsheet written as an equation. Here's the linear algebra introduction I wish I had, with a real-world stock market example.

An Intuitive Guide to Linear Algebra - Better Explained
The basic problem of linear algebra is to find these values of x and y i.e. the solution of a set of linear equations. Broadly speaking, in linear algebra data is represented in the form of linear equations. These linear equations are in turn represented in the form of matrices and vectors.
