A classic nursing reference, the fully updated Lippincott Manual for Nursing Practice, 11th Edition, offers expert nursing knowledge and much-needed practical guidance on patient care.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions--with rationale--to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

This supplemental text/reference of 55 nursing care plans addresses the most commonly encountered behaviors and behavior complexes in psychiatric and mental health nursing. The thoroughly updated Sixth Edition responds to current community-based care settings, across-the-lifespan care, cultural considerations, violence in the community, and community grieving. Also, this edition presents a stronger focus on interdisciplinary care; community resources available to clients and their family/support groups; Web-based resources; communication content; and a sample assessment tool. DSM-IV terminology/organization and NANDA diagnoses are used. And it includes a free disk with printable nursing care plans!

Universally respected, the authoritative 'Lippincott Manual' (sometimes called just the 'Lippincott') continues to be the most comprehensive reference 'tool kit' that practicing nurses and nursing students turn to for essential nursing knowledge and up-to-date information on patient care. LMNP is widely used as a procedure manual for many healthcare institutions (contains 109 Nursing Procedure Guidelines) and is widely regarded as the Gold Standard for nursing practice in the courtroom. Organized into five major parts, LMNP presents a comprehensive reference for all types of core nursing care. Part 1: Nursing Process & Practice; Part 2: Medical-Surgical Nursing; Part 3: Maternity & Neonatal Nursing; Part 4: Pediatric Nursing; Part 5: Psychiatric Nursing. Official Guidelines that shape practice are incorporated and include those from the National Institutes of Health, American Diabetes Association, American Heart Association, American Nurses Association, Joint Commission, AWHONN, and others; Plentiful additional resources as well as Web sites are included.

Master Need-to-Know Psychiatric Nursing Information with Ease Gain the basic knowledge and patient interaction skills you need to

## Online Library Lippincotts Manual Of Psychiatric Nursing Care Plans Manual Psychiatric Nursing Car

confidently prepare for psychiatric nursing practice with this concise, engaging text. Essentials of Psychiatric Nursing is easy to understand and rich with clinical examples and explanations that clarify challenging concepts and help you build the unique therapeutic communication capabilities necessary to excel in the care of patients with common mental health disorders. New! Unfolding Patient Stories, written by the National League for Nursing, immerse you in commonly encountered clinical scenarios and equip you for successful patient interactions. Concept Mastery Alerts drawn from the Lippincott®PrepU adaptive learning system clarify the most challenging mental health nursing concepts. NCLEX Notes keep you focused on important application areas for success on the NCLEX®. Case Studies interwoven in the mental health disorder chapters help you apply theory to nursing care for specific disorders, supported by online videos that reveal symptoms and procedures in greater detail. Emergency Care Alerts help you recognize situations that may require immediate or specialized care. Nursing Management of Selected Disorders sections familiarize you with the most common major psychiatric disorders. Research for Best Practice boxes reinforce the latest evidence and implications from relevant studies to guide and validate interventions. Therapeutic Dialogue features compare and contrast therapeutic and nontherapeutic conversations to help you hone your patient communication skills. Psychoeducation Checklists help you develop effective patient and family teaching plans. Clinical Vignette features and accompanying questions challenge you to identify solutions to commonly encountered patient scenarios. Drug Profile boxes reinforce your understanding of commonly prescribed medications for patients with mental health problems. Key Diagnostic Characteristics summaries provide fast access to diagnostic criteria, target symptoms, and associated findings for select disorders as described in the DSM-5 by the American Psychiatric Association. Available on the book's companion website, Nursing Care Plans based on case scenarios guide you through the diagnostic stages and plan of care for patients with a particular diagnosis.

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as

## Online Library Lippincotts Manual Of Psychiatric Nursing Care Plans Manual Psychiatric Nursing Car

appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.
