A gorgeously illustrated, lyrical non-fiction picture book about loons. It's summertime, and as darkness falls there is a haunting sound from the lake — Ooh-hoo-oo, ooh-hoo-oo. It is a loon calling to its family across the water. This lyrical story follows the life cycle of two loon chicks. We see them breaking out of their eggshells, then learning to swim, find food and avoid predators such as snapping turtles and big bass fish. After they learn to fly, they migrate to the ocean. And when their striking black-and-white feathers finally emerge, they fly inland, each to find a new lake territory and mate. Accompanying Susan Vande Griek's poetic text are Karen Reczuch's gorgeous illustrations, which show the loons as they grow from tiny downy chicks to majestic adult birds. An afterword provides more information on loons, including their amazing diving ability, the meanings of their calls, and the environmental threats that they face. Also illustrated are five different types of loons and other animals that can be found in their lake habitat. The illustrations were researched in the Ornithology Collections at the Royal Ontario Museum, and Ron Ridout of Bird Studies Canada consulted on the text. “ Kids like me didn ’ t go to Vietnam, ” writes Jack McLean in his compulsively readable memoir. Raised in suburban New Jersey, he attended the Phillips Academy in Andover, MA, but decided to put college on hold. After graduation in the spring of 1966, faced with the mandatory military draft, he enlisted in the United States Marine Corps for a two-year stint. “ Vietnam at the time was a country, and not yet a war, ” he writes. It didn ’ t remain that way for long. A year later, after boot camp at Parris Island, South Carolina, and stateside duty in Barstow, California, the Vietnam War was reaching its peak. McLean, like most available Marines, was retrained at Camp Pendleton, California, and sent to Vietnam as a grunt to serve in an infantry company in the northernmost reaches of South Vietnam. McLean ’ s story climaxes with the horrific three-day Battle for Landing Zone Loon in June, 1968. Fought on a remote hill in the northwestern corner of South Vietnam, McLean bore witness to the horror of war and was forever changed. He returned home six weeks later to a country largely ambivalent to his service. Written with honesty and insight, Loon is a powerful coming-of-age portrait of a boy who bears witness to some of the most tumultuous events in our history, both in Vietnam and back home.
