The brain is one of the largest and most complex organs in the human body. It is made up of more than 100 billion nerves that communicate in trillions of connections called synapses.

Brain (Human Anatomy): Picture, Function, Parts ...
A research team led by the University of Iowa has upended current thinking about areas in the human brain responsible for self-awareness. Pointing to the example of a rare patient with damage to areas long considered vital to the phenomenon, the researchers propose that self-awareness stems from a diffuse patchwork of pathways in the brain, rather than specific areas.
