Although not normal, it's not serious if it doesn't lead to inflammation or damage. However, once there's a build-up of fat, the liver becomes vulnerable to injury. Others have what's called non-alcoholic steatohepatitis (NASH). NASH can lead to permanent liver damage and cirrhosis. Both types of non-alcoholic fatty liver disease (NAFLD) are becoming more common. Up to 20% of adults have either fatty liver or NASH. The most common causes of fatty liver disease are obesity and diabetes mellitus. Written by experts and based on the most current information available, this indispensable guide is for anyone living with fatty liver disease. We live in an age of unprecedented flourishing of technology in medicine. So why are we experiencing such epidemic levels of pain, disease, emotional and mental stress, and just plain old poor health--and often at such uncommonly young ages? Searching to answer these questions, we turn to every possible medical specialty and lifestyle cause, looking for clues. After guiding thousands of patients on their journeys back to health, Dr. Linda Lancaster has discovered that it is the interplay of invisible forces such as chemicals, heavy metals, radiation, and opportunistic parasites--the "Five Culprits"--worms, fungus, bacteria, micro-parasites, and viruses, that are the cause of many of the health struggles we experience today. This fundamental dynamic is the origin of most of the symptoms she has seen, including chronic exhaustion, digestive distress, painful joints, infertility, eczema, and mysterious conditions like Lyme Syndrome. If you have experienced any of these symptoms, you know how the physical experience affects your emotional wellbeing. But it doesn't have to be that way. You can begin to take your life back with Harmonic Healing. In this six-week foundational program, you will learn how to cleanse your liver, neutralize environmental pollution, revitalize your energy and return to a balanced state of health, using solely nontoxic, inexpensive, and natural protocols.
